ABOUT ME

With over 12 years of experience specialised in front-end development, bringing a deep expertise in designing and implementing user-centered, innovative web solutions, with a passion for building exceptional user experiences.

In my free time I love walking, listening to podcasts, and skiing during winter when there is enough snow.

Every once in a while I try my luck in delivering a personal idea into reality. A number of failed attempts will not stop me from keep trying.

EDUCATION

University of Belgrade

Belgrade, Serbia

Bachelor of Faculty of Organisational Sciences, Information Systems and Technologies

EXPERIENCE

Senior Software Engineer @ Avaya

Since Jan 2018 - Remote

- > Participated in setting up architecture for Contact Centre desktop client for handling customer interactions supporting multiple channels such as Voice, SMS, Chat, Messaging, Video. Client is used by **millions of users**, and is built in Angular framework using Redux for store management.
- > Created accessible and functional user interfaces following Web Content Accessibility Guidelines 2.0
- > Developed from scratch [Widget Framework](#) containing various user interface components, and API for displaying different user functionality.
- > Optimised existing codebase, resulting in **≈17% reduction in processing time**.
- > Developed UI for displaying analytics delivering reports on work collected and updated in real-time.

Senior Software Engineer @ MERA

Jun 2015 - Dec 2017 - Belgrade, Serbia

- > **Lead a team** of 4 developers on creating and maintaining a Contact Centre application developed in AngularJS.
- > Participated in development of a CCTV web app in AngularJS.
- > Developed from scratch a web based CMS for fitness platform management.

Wordpress Developer @ Aetius Media

Nov 2014 - Jun 2015 - Remote

- > Development and maintenance of a Wordpress sites using Git, SASS, Gulp, Bower etc., following the best practices in WP development.

Web Developer @ NB Soft

Jul 2012 - Sep 2014 - Belgrade, Serbia

- > Worked closely with UX team on creating a common re-usable CSS theme and JS code for e-shop web applications. Parts of it are used to this date.
- > Played an important role in creating multiple e-shop applications with high traffic such as [PlanetaSport](#), [SportVision](#), and [DecjiSajt.rs](#).
- > Developed and maintained a CMS for supply chain management for [Vlasina Water](#).
